National Collaborating Centre for Healthy Public Policy (NCCHPP)

Our mandate

- Support public health actors in their efforts to promote healthy public policies

Our areas of expertise

- The effects of public policies on health
- Generating and using knowledge about policies
- Intersectoral actors and mechanisms
- Strategies to influence policy making

Paternalism in public health

What do you think? Is it legitimate for the state to:

A. Forbid people from smoking in cars while children are present?

B. Forbid people from smoking in cars, even when they are alone?

Should we protect people against others?

Should we protect people against themselves?

Harm principle

Paternalism

Political liberalism

Objectives

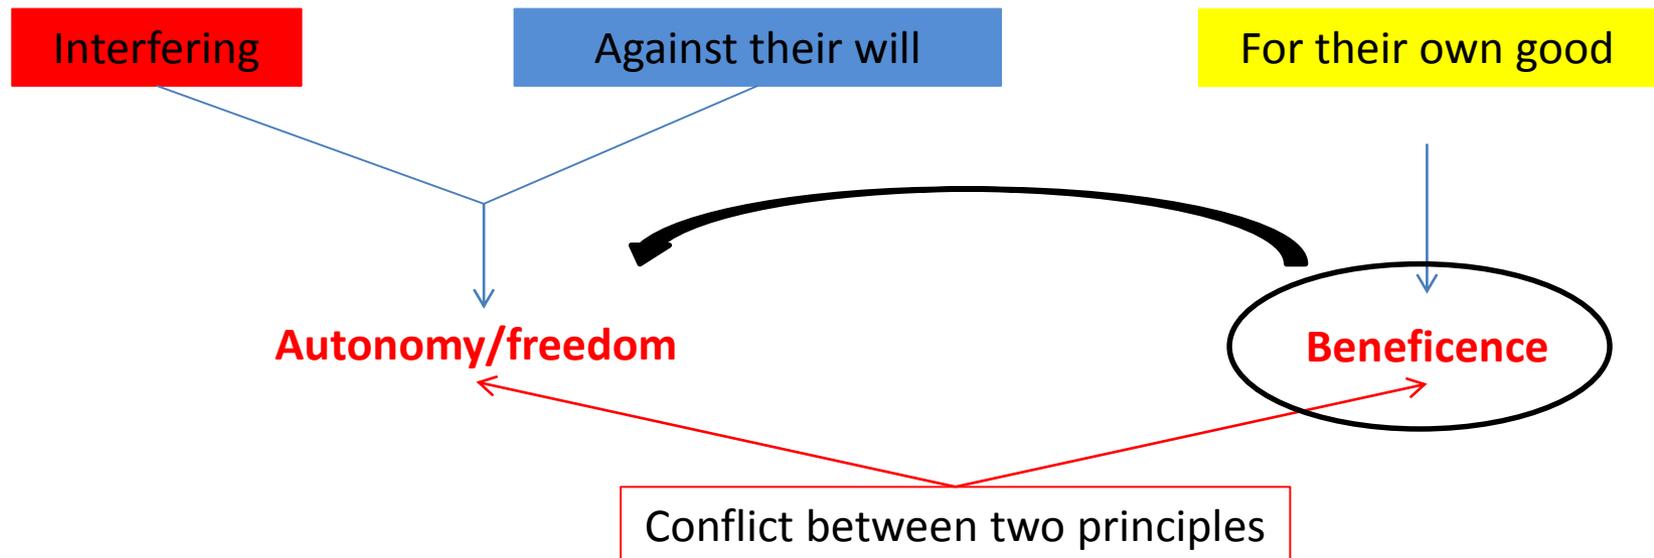

To briefly answer the following questions:

- What is **paternalism**?
- Why are we **attracted to** *and* **uneasy about** paternalistic public policies in public health?
- How might we do an **ethical analysis** of policies that are said to be paternalistic in public health?

What is paternalism?

“Paternalism is the **interference** of a state or an individual with another person, **against their will**, and defended or motivated by a claim that the person interfered with **will be better off** or **protected from harm**.”

(Dworkin, 2002)

What about 'paternalistic' public policies?

Attractive?

People say they are:

- **More effective?**
 - There are limits to what information campaigns can achieve
- **More efficient?**
 - Limiting options can be less costly
- **More equitable?**
 - Freedom of choice in the free market leads to health inequalities

Problematic?

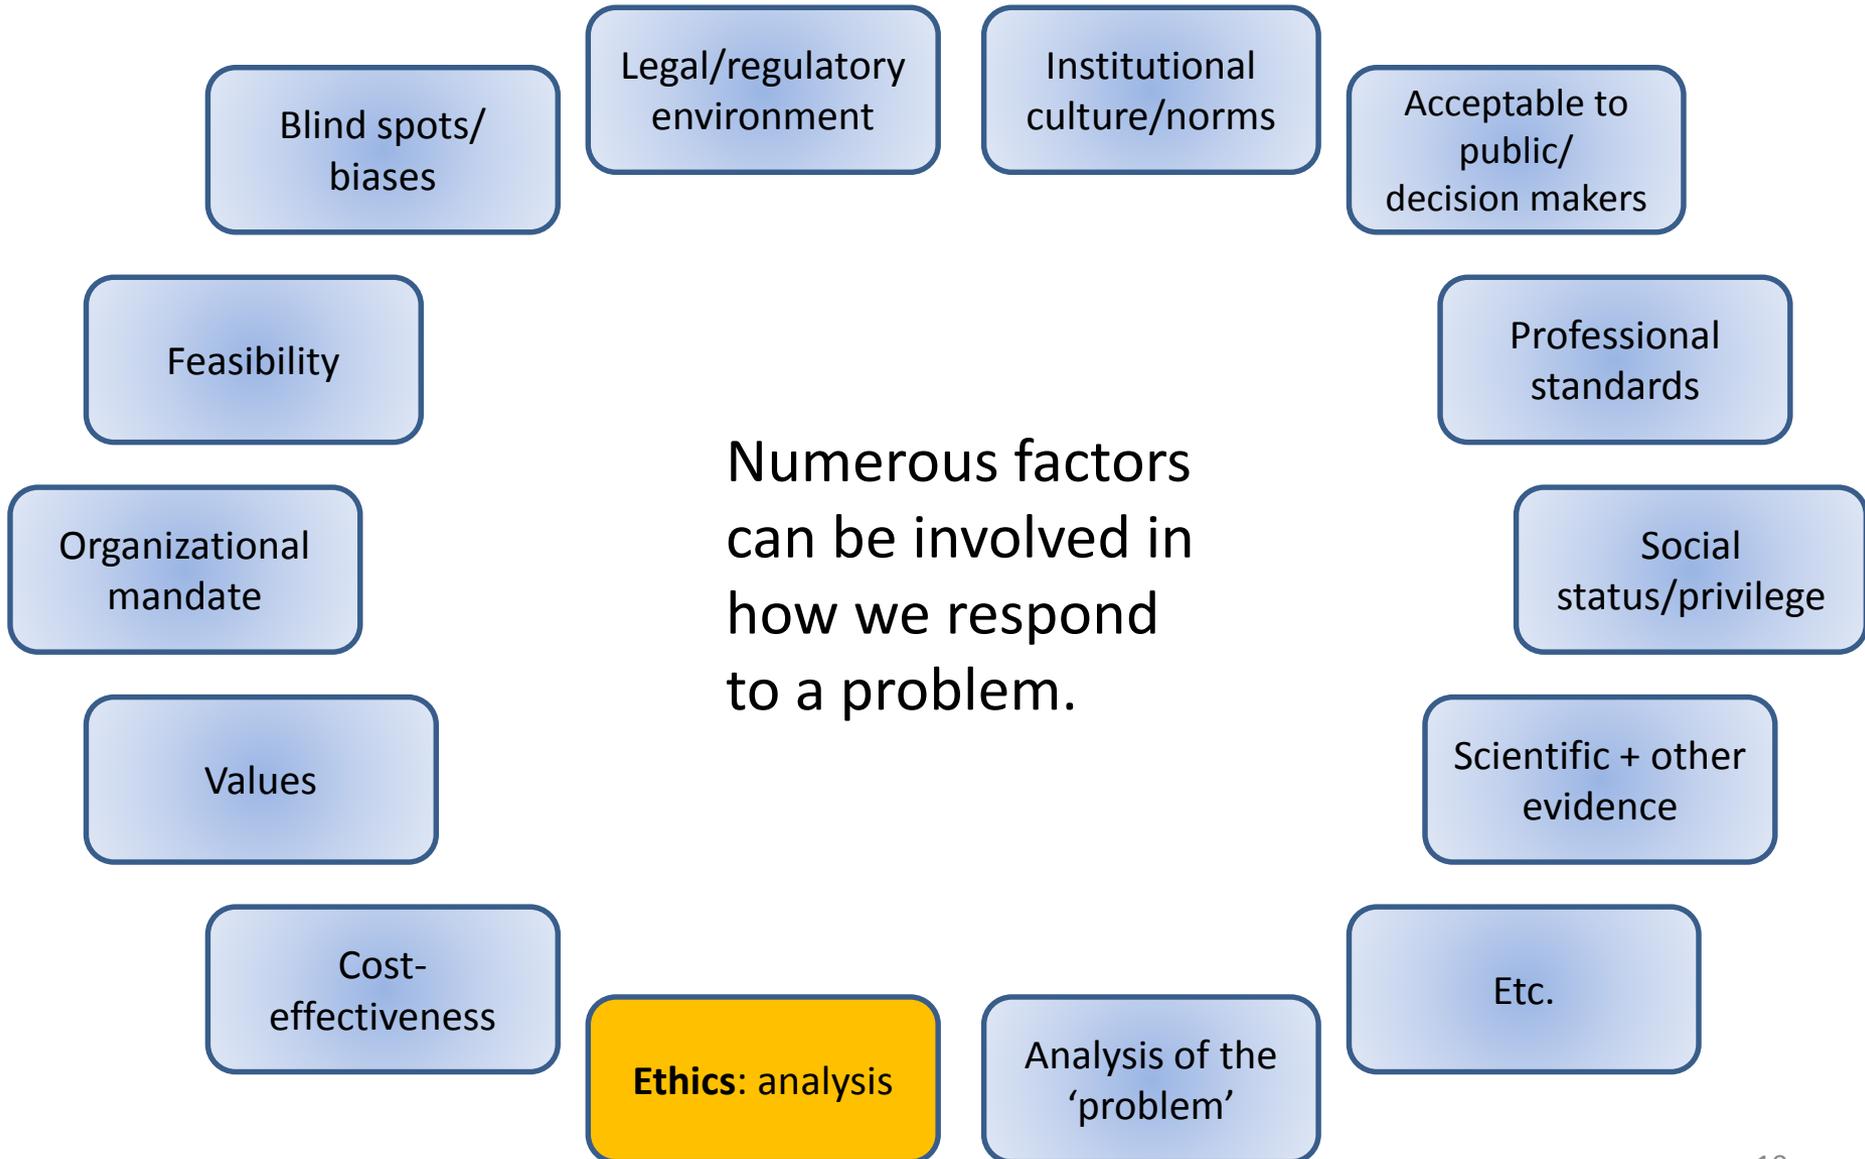

People say they are:

- **Disrespectful?**
 - People are treated like children, as if unable to decide for themselves
- **Anti-freedom?**
 - We should be free to do what we like as long as it doesn't hurt anyone else
- **Tyrannical?**
 - The state imposes its values on us: we are capable of defining our own way

Examples of public policies in public health that have been called paternalistic

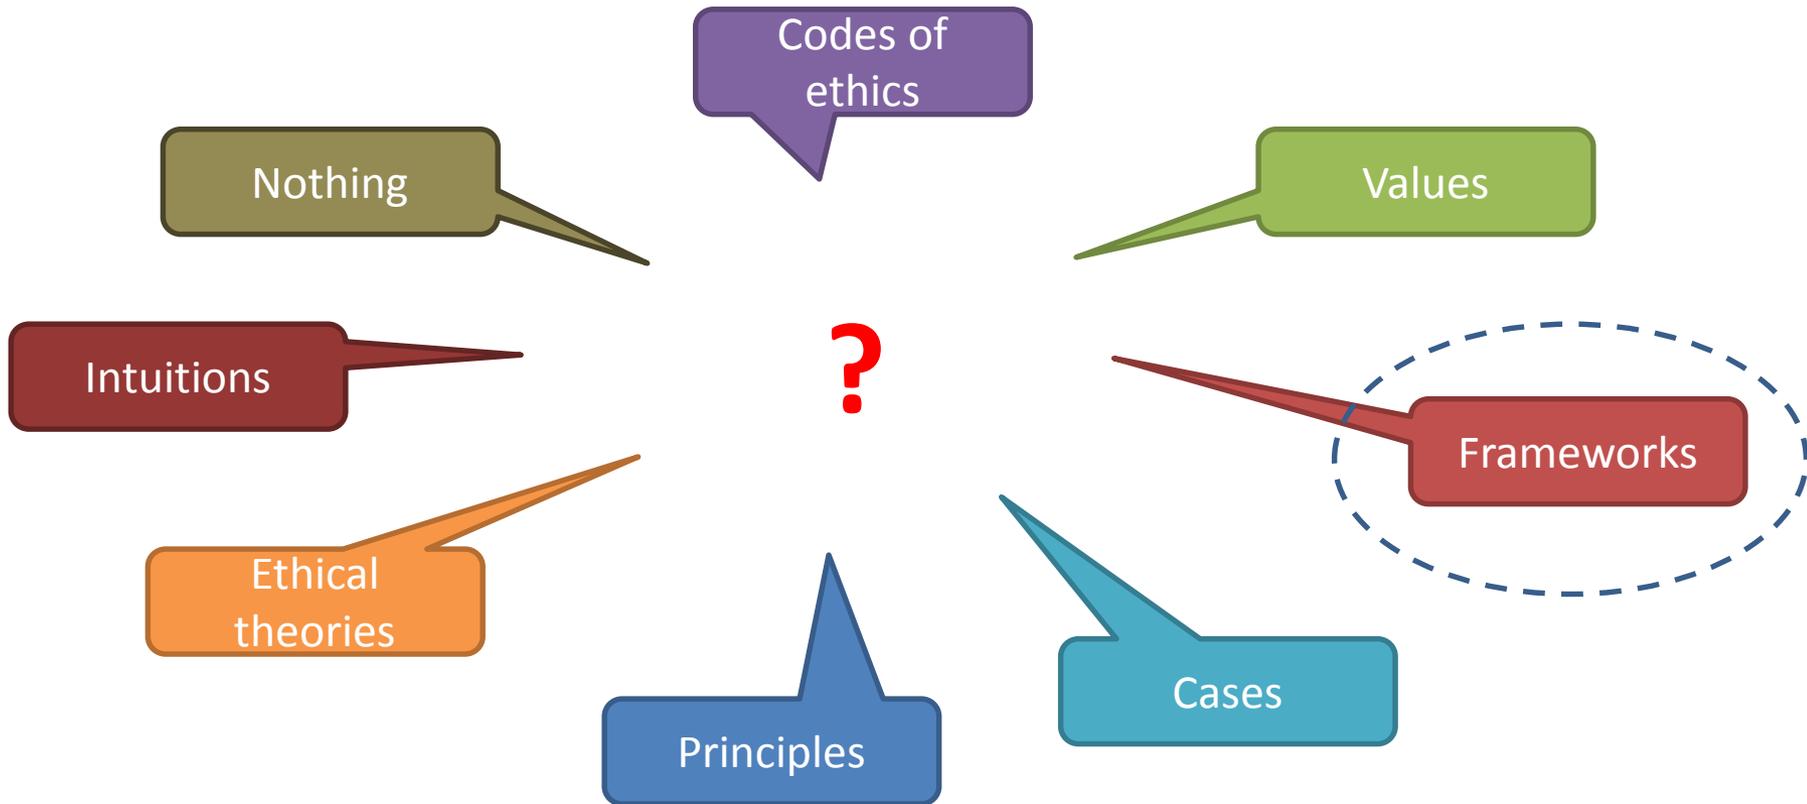

- Prohibition of the sale of cigarettes, alcohol, cannabis, tanning salon sessions to minors
- Mandatory seat belt use in cars
- Mandatory use of helmets for motorcycling, or for cycling
- Nutrition labelling required on packaged foods
- Prohibition of swimming at public beaches without a lifeguard
- Limits on fast food restaurants around schools
- Limits on the serving sizes of sugary drinks
- Taxes on sugary drinks, alcohol, cigarettes, etc.
- Ignition interlock devices installed in all cars
- Fluoridation of drinking water
- ...

What to *do*? How to *decide*?

These are just a few among many. All of these are important and call for critical attention.

What can we use to help us think about ethical issues in public health?

What is an ethics framework?

- A framework is a guide that can help professionals to adopt an ethical perspective to
 - highlight ethical values and issues, and
 - serve as an aid to deliberation and decision making
- No prior expertise in ethics is required – even if it always helps
- Alas, it will only *help* to guide you – the work is still up to you (especially the critical thinking) and so are the decisions

4 cases to test a new framework (in development)

1. Mandatory, detailed nutrition labelling on all packaged foods

2. Obligatory seat belt use

3. A law imposing limits on the serving sizes of sugary drinks

4. Ignition interlock device required in all cars (i.e., breathalyzer test to start the car).

Questions/comments?

How to analyze policies that are called paternalistic?

Centre de collaboration nationale
sur les politiques publiques et la santé

de santé publique
Québec 

How might we do an ethical analysis of policies in public health that are called paternalistic?

A framework in three steps:

1. Determine if the policy option really is paternalistic
2. Determine which type(s) of paternalism it is
3. Broaden the analysis with the help of a more general ethics framework.

Step 1: Determine if the policy option really is paternalistic (1)

Paternalism is a formidable rhetorical weapon

“Paternalism is something we often accuse people of.”

- Feinberg (1986), p. 4.

It is therefore used to frame the debate and to try to get people to reject an option without further consideration.

1.1. Does a paternalistic reason **really** figure among the main reasons behind the policy that is "**called**" paternalistic?

Yes/No

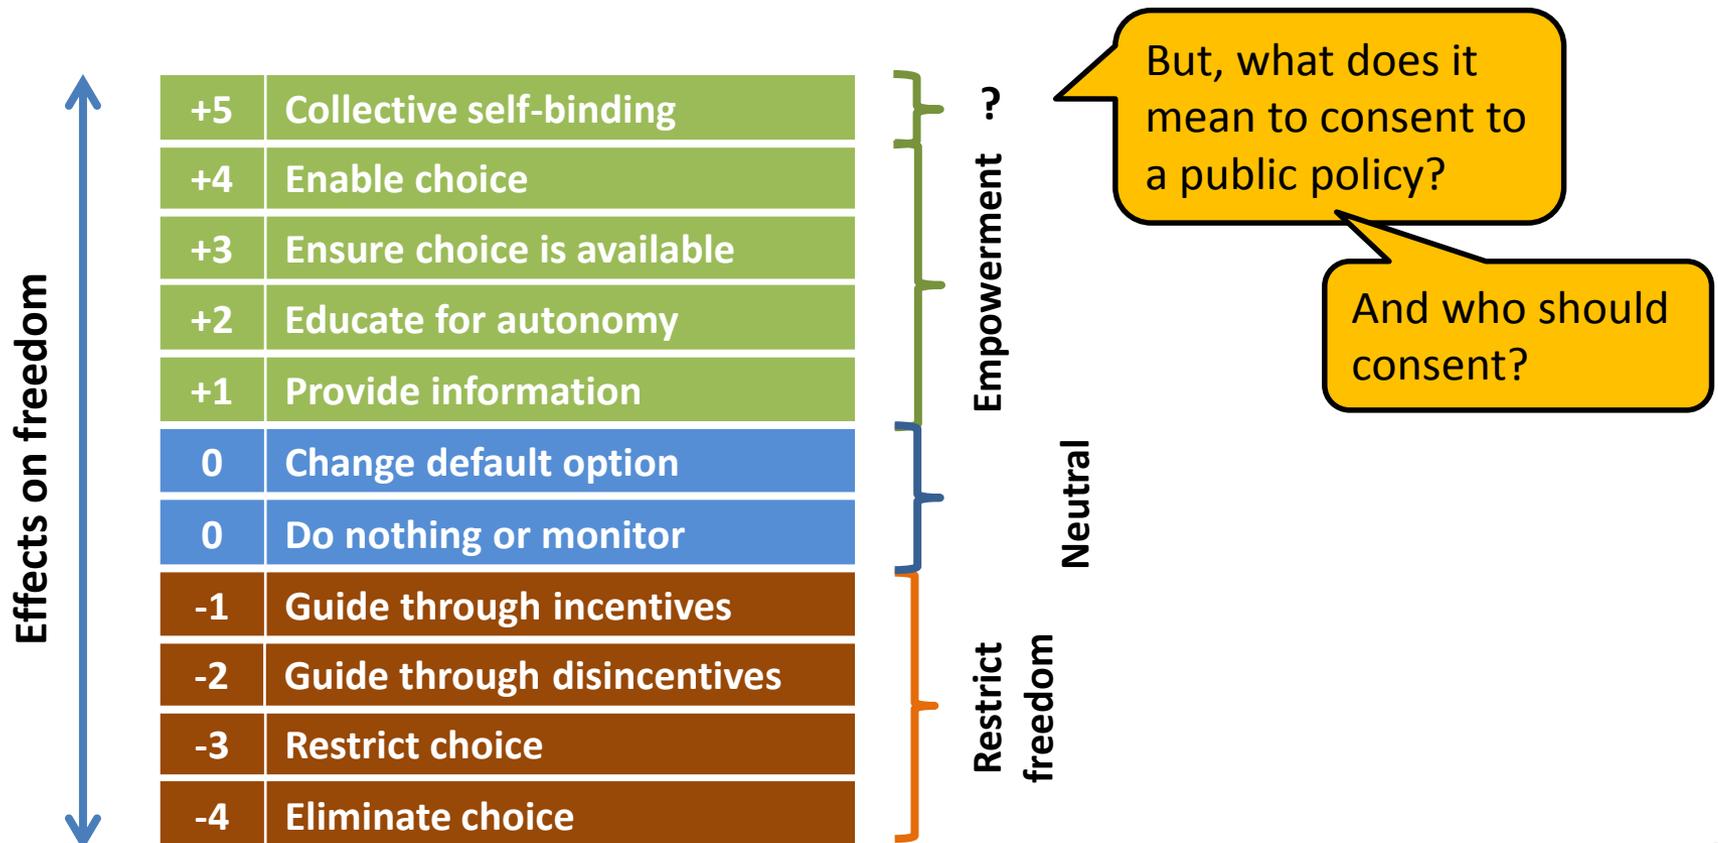

Step 1: Determine if the policy option really is paternalistic (2)

1.2. Is it a case of **beneficence** or **paternalism**?

Beneficence	Paternalism
For their own good	For their own good Restrict freedom Against their will

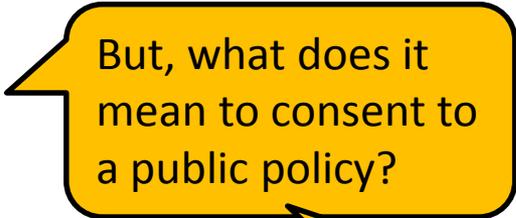

Step 1: Determine if the policy option really is paternalistic (3)

1.2.1. Does the policy **restrict freedom** or would it be better understood as a form of **empowerment**?

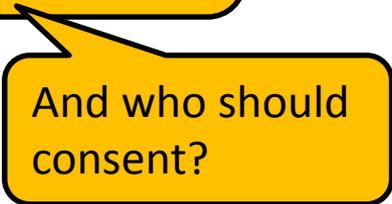

Step 1: Determine if the policy option really is paternalistic (4)

1.2.1. Does the policy **restrict freedom** or would it be better understood as a form of **empowerment**?

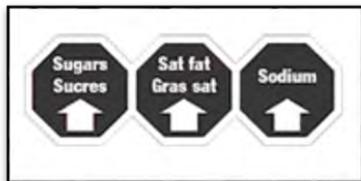

But, what does it mean to consent to a public policy?

And who should consent?

1.2.2. Is the affected population **supportive** or **opposed** to the policy?

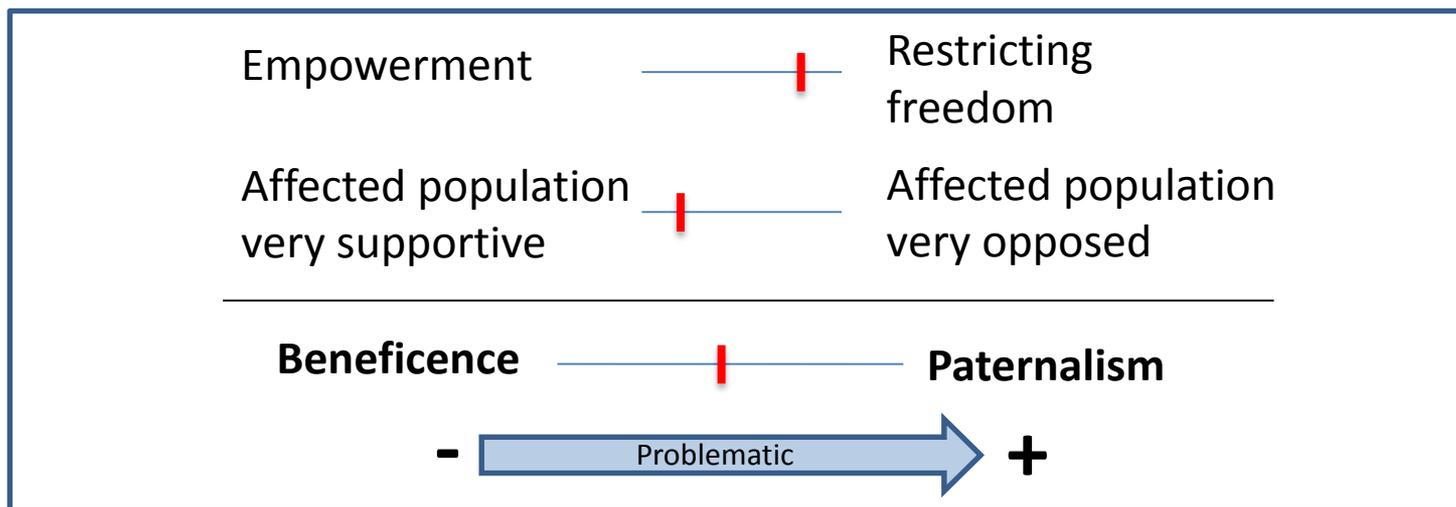

Step 1: Determine if the policy option really is paternalistic (5)

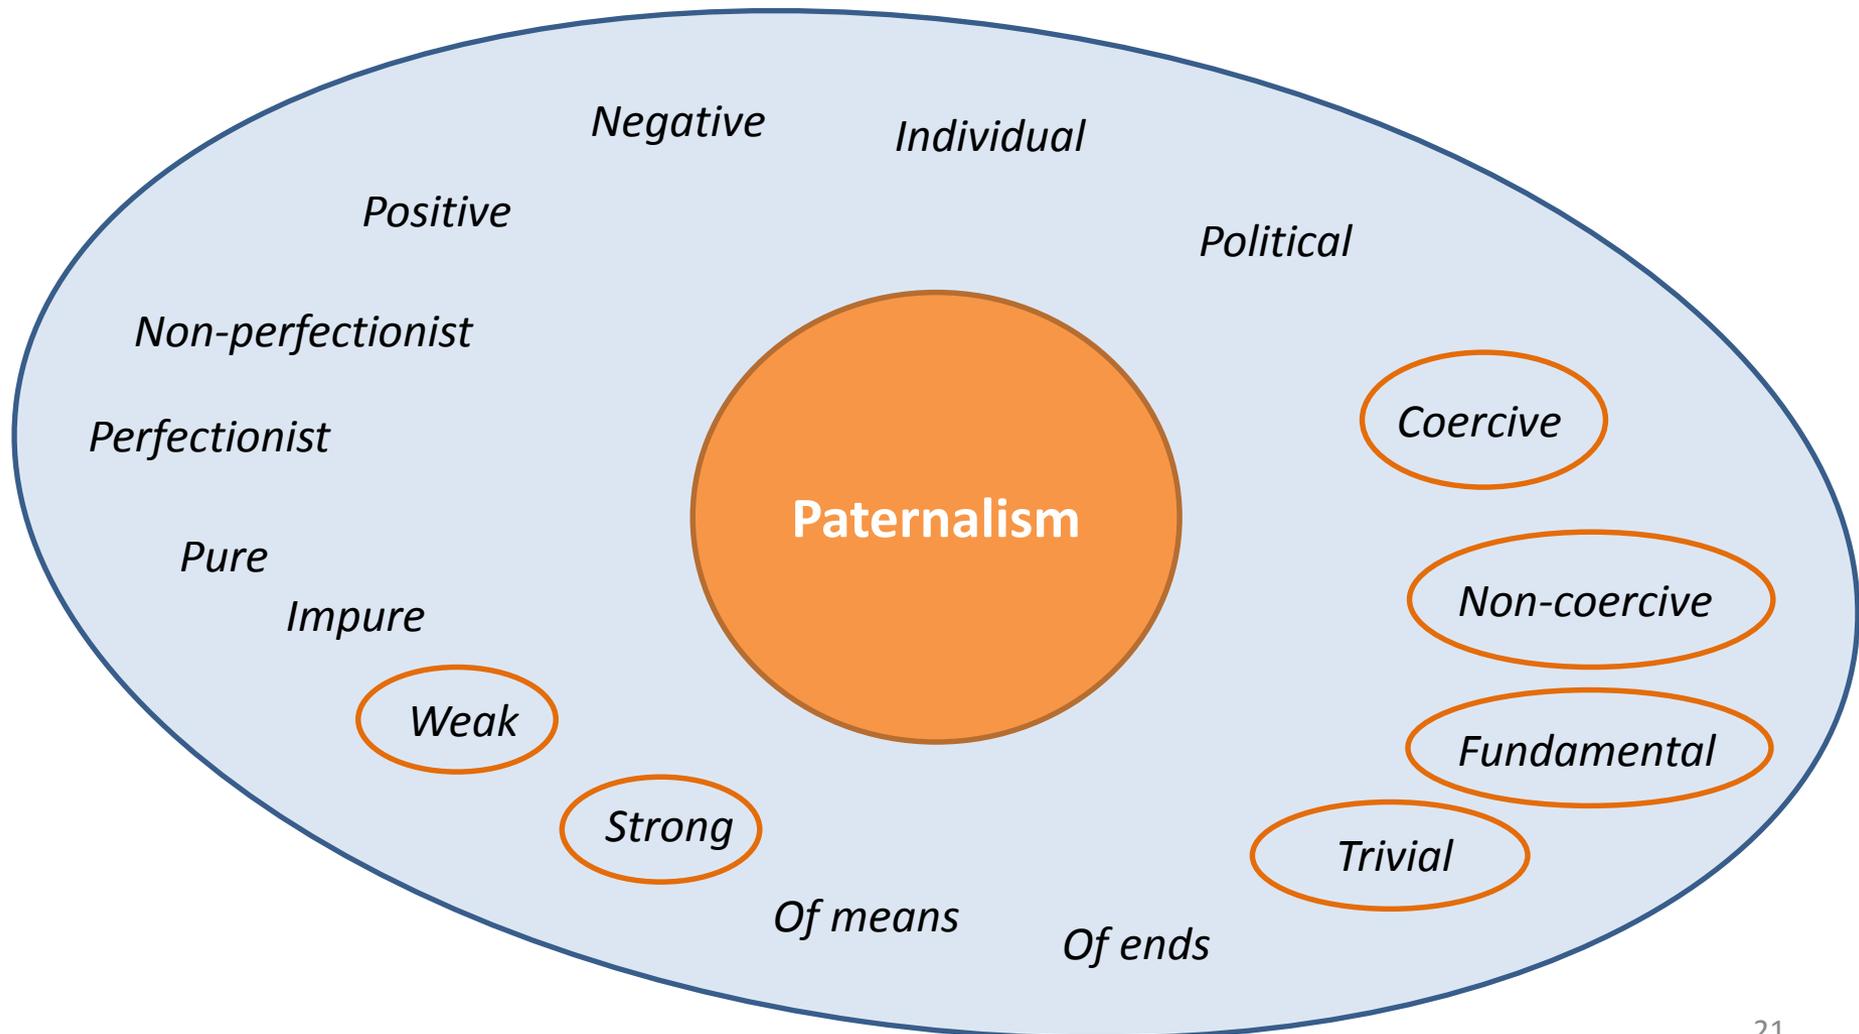

1.1. Does a paternalistic reason **really** figure among the reasons behind the policy that is "**called**" paternalistic?

Yes/No

1.2. Is it a case of **beneficence** or **paternalism**?

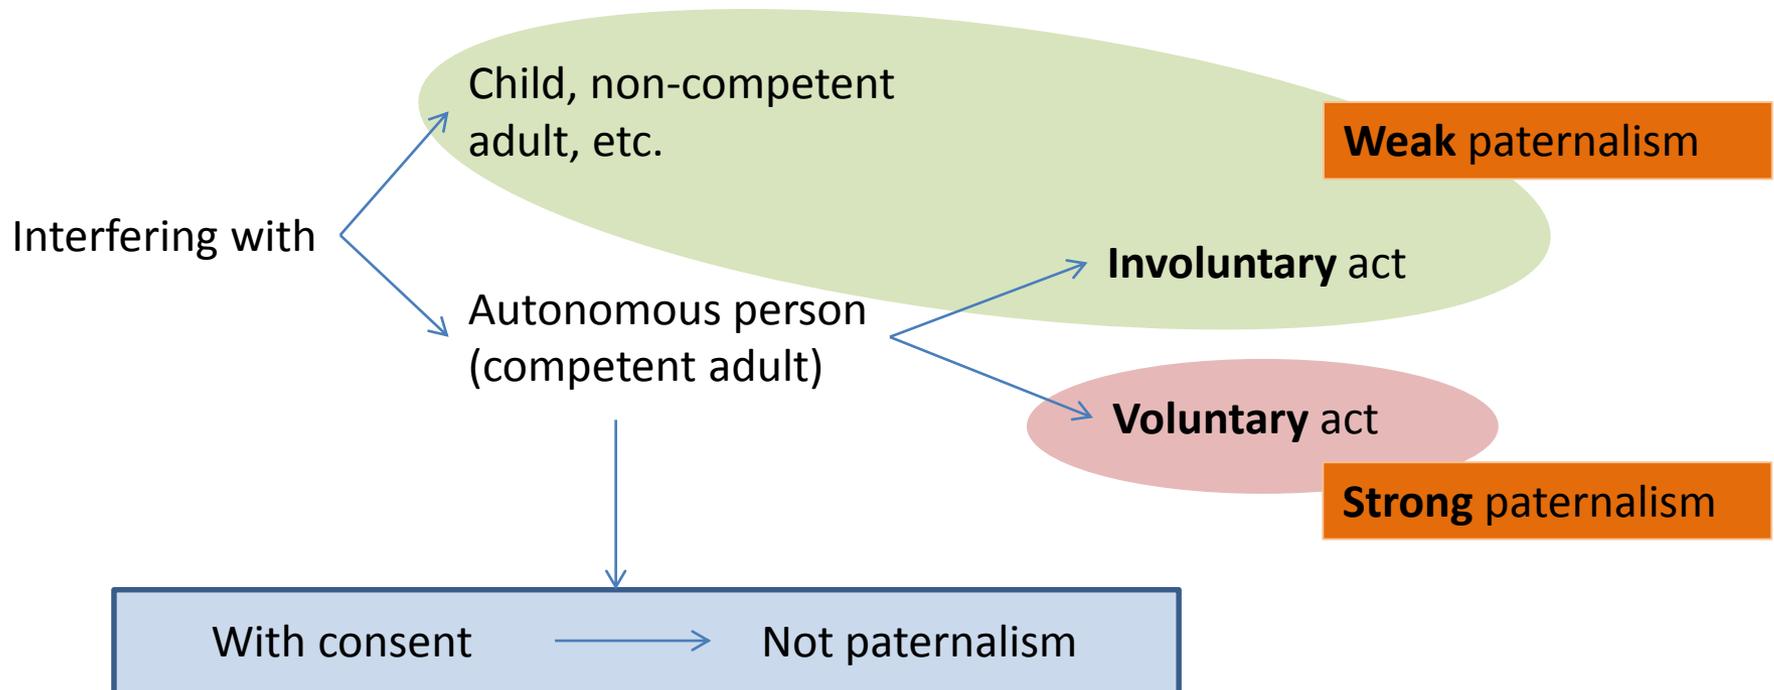

Step 2: Determine which type(s) of paternalism it is

Distinction 1: **strong** or **weak** paternalism?

“Paternalism is the interference of a state or an individual with another person, **against their will**, and defended or motivated by a claim that the person interfered with will be better off or protected from harm.”

(Dworkin, 2002)

Voluntary/involuntary acts (1)

Voluntary acts

Fully thought-out choices of competent, autonomous, rational and well-informed adults

Strong paternalism

Emotional acts?

Smoking?

Weak paternalism

Adolescent's acts?

Acts of heavily intoxicated people (alcohol, drugs, etc.)?

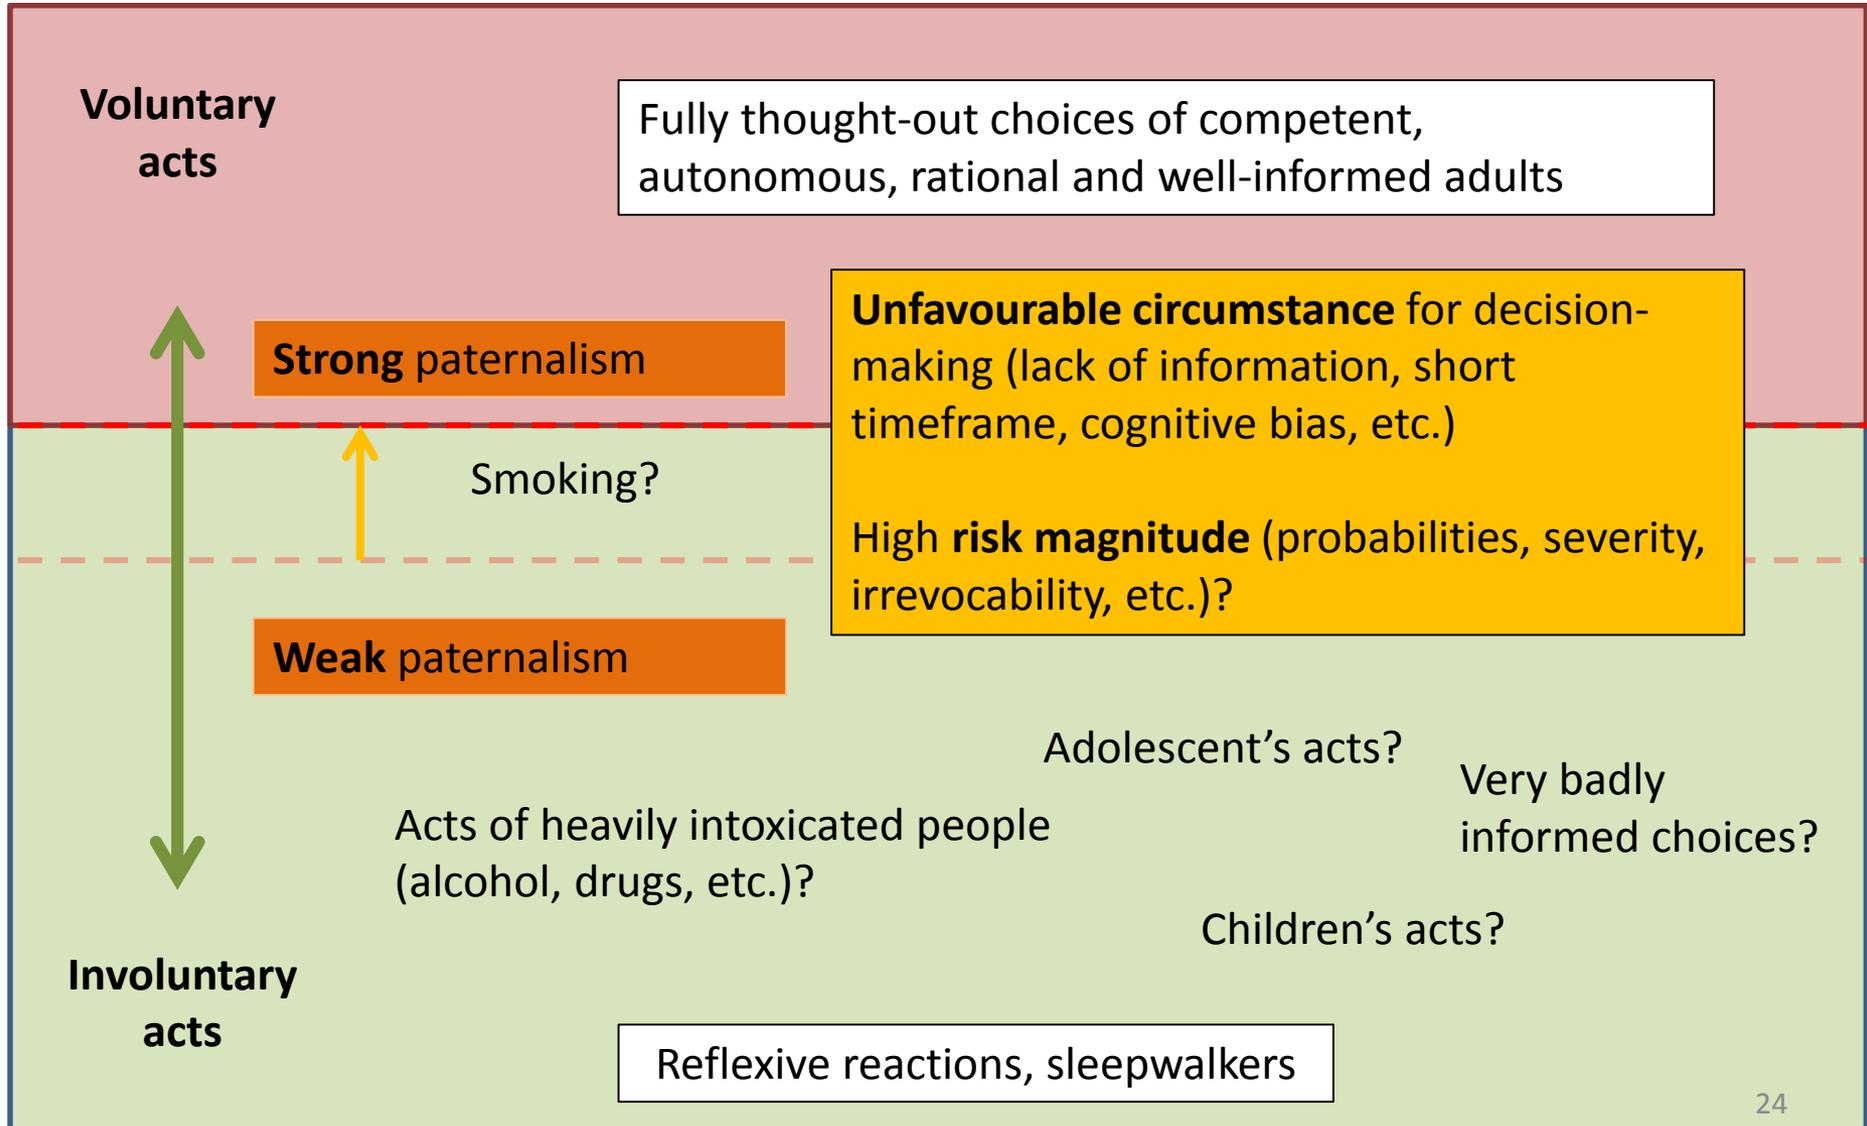

Very badly-informed choices?

Children's acts?

Involuntary acts

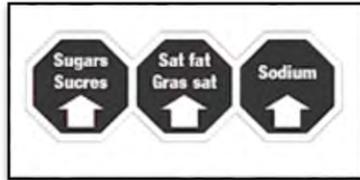

Reflexive reactions, sleepwalkers

Voluntary/involuntary acts (2)

2.1. Is it strong or weak paternalism?

Labelling

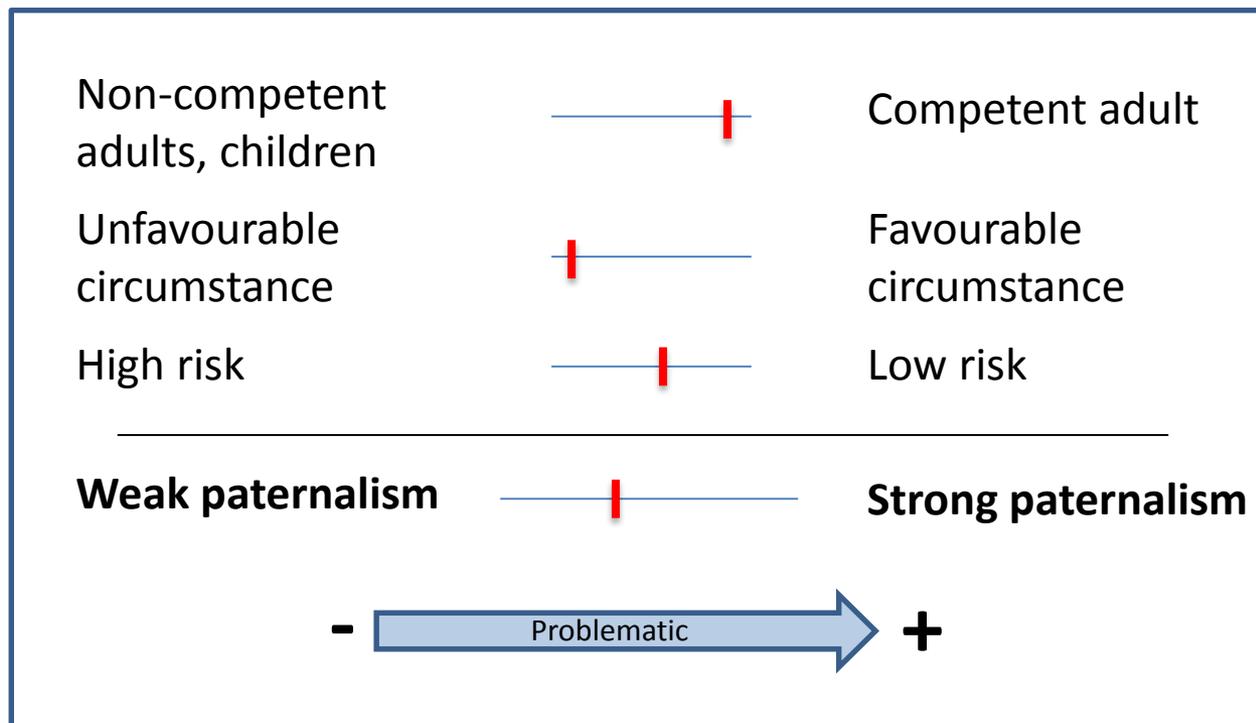

Soda size

Seat belts

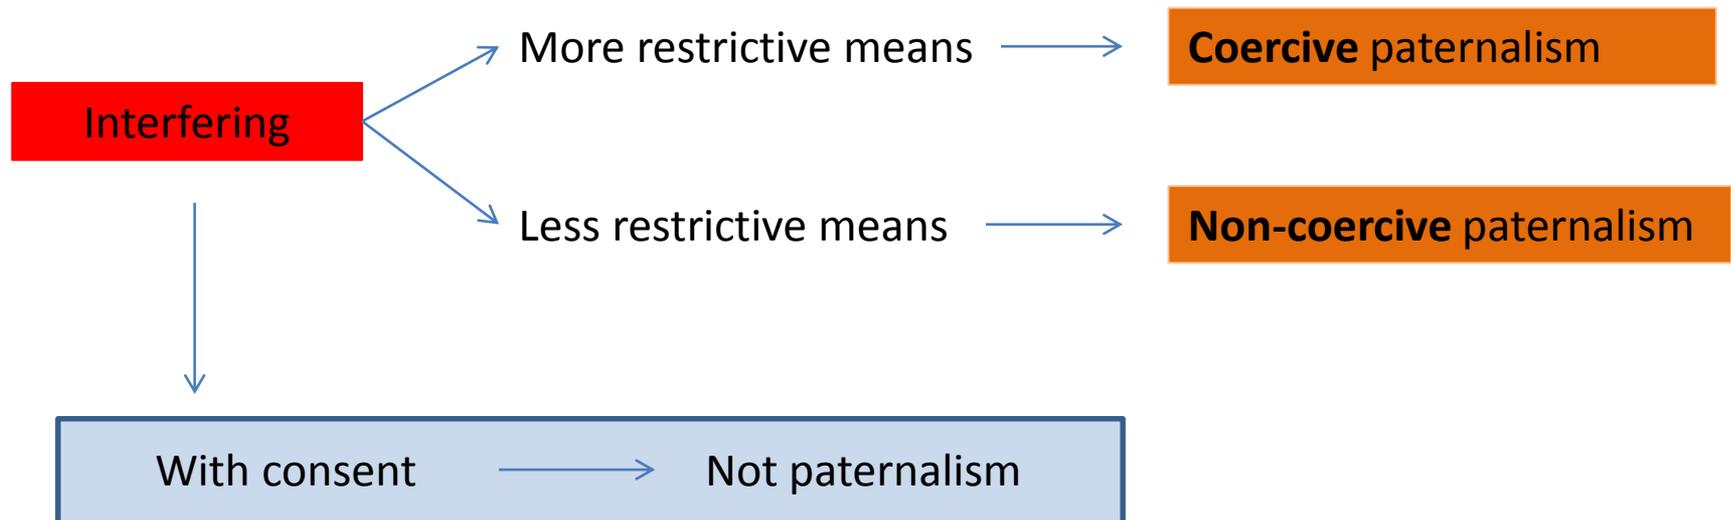

Interlock

Distinction 2: **coercive** or **non-coercive** paternalism?

“Paternalism is the **interference** of a state or an individual with another person, against their will, and defended or motivated by a claim that the person interfered with will be better off or protected from harm.”

(Dworkin, 2002)

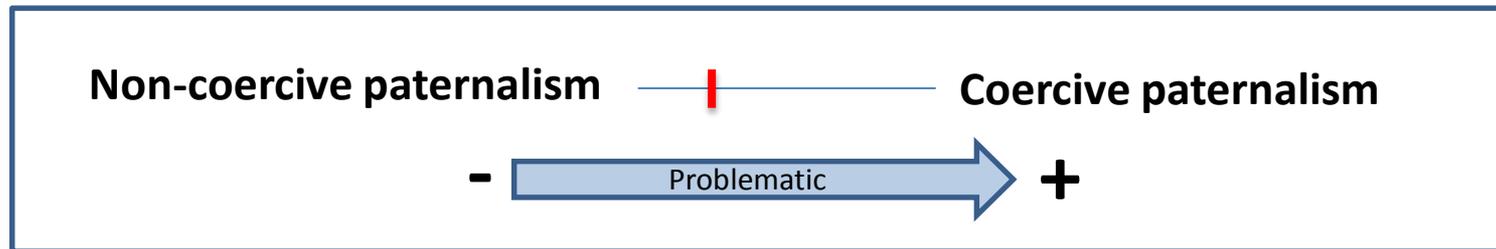

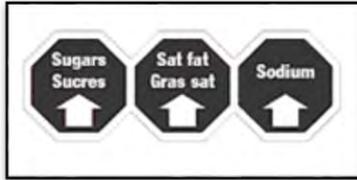

Assessing the degree of interference upon freedom

The Nuffield Council on Bioethics' (2007) intervention ladder

Interference with freedom + -	Eliminate choice	Ban cigarettes and trans fats	Coercive
	Restrict choice	Limit fast-food restaurants around schools	
	Guide through disincentives	Tax sugary drinks; limit the supply of parking spaces	
	Guide through incentives	Subsidize public transit	
	Change default option	Change the default option from French fries to salad	Non coercive
	Enable choice	Build cycle paths; offer healthy food choices in public arenas	
	Inform	Graphic warnings on cigarette packs	
	Do nothing or monitor	Monitor trends in overweight and obesity	

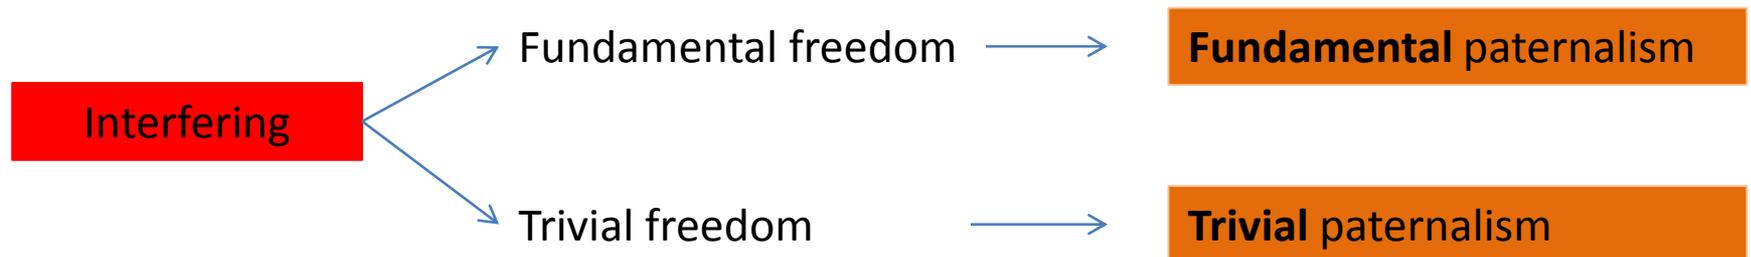

2.2. Is it coercive or non-coercive paternalism?

Distinction 3: **fundamental** or **trivial** paternalism?

“Paternalism is the **interference** of a state or an individual with another person, against their will, and defended or motivated by a claim that the person interfered with will be better off or protected from harm.”

(Dworkin, 2002)

Who decides... and for whom?

Risks:

The majority imposes its values on minorities

The more powerful impose their values on the less powerful and marginalized?

2.3. Is it fundamental or trivial paternalism?

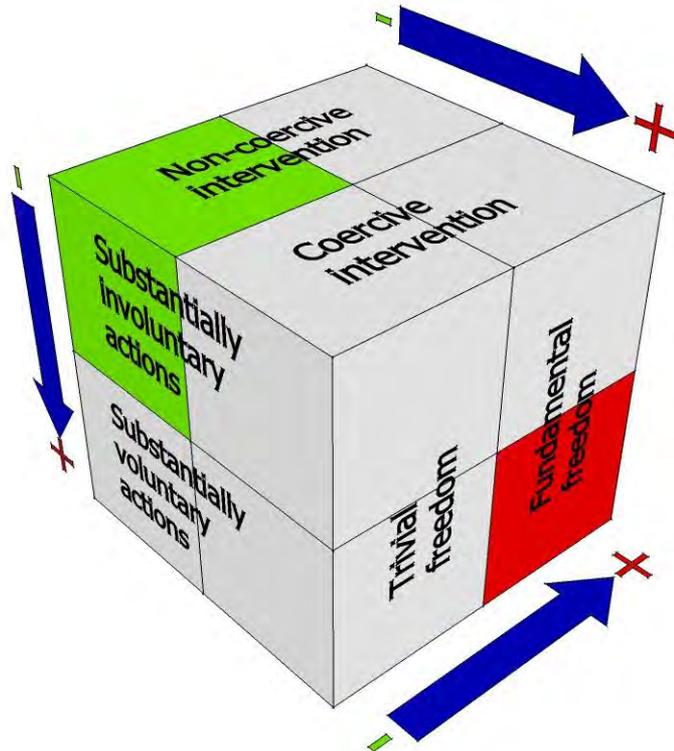

Trivial paternalism ————|————— Fundamental paternalism

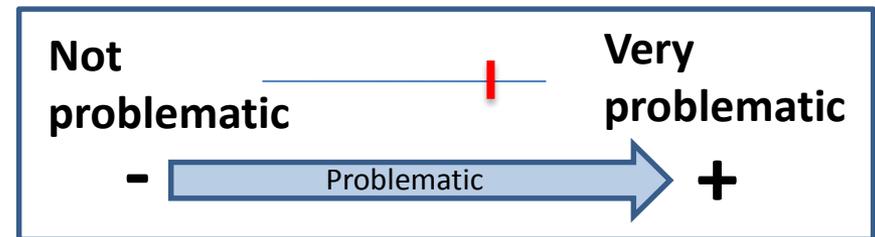

Step 2: Determine which type(s) of paternalism it is - summary

2.4. A visual summary: where would you situate the intervention?

2.5. Overall, how problematic is the paternalistic aspect of the policy or intervention?

Step 3: Broaden the analysis with the help of a more general ethics framework (1)

There is rarely just one unique reason for intervening (or not).

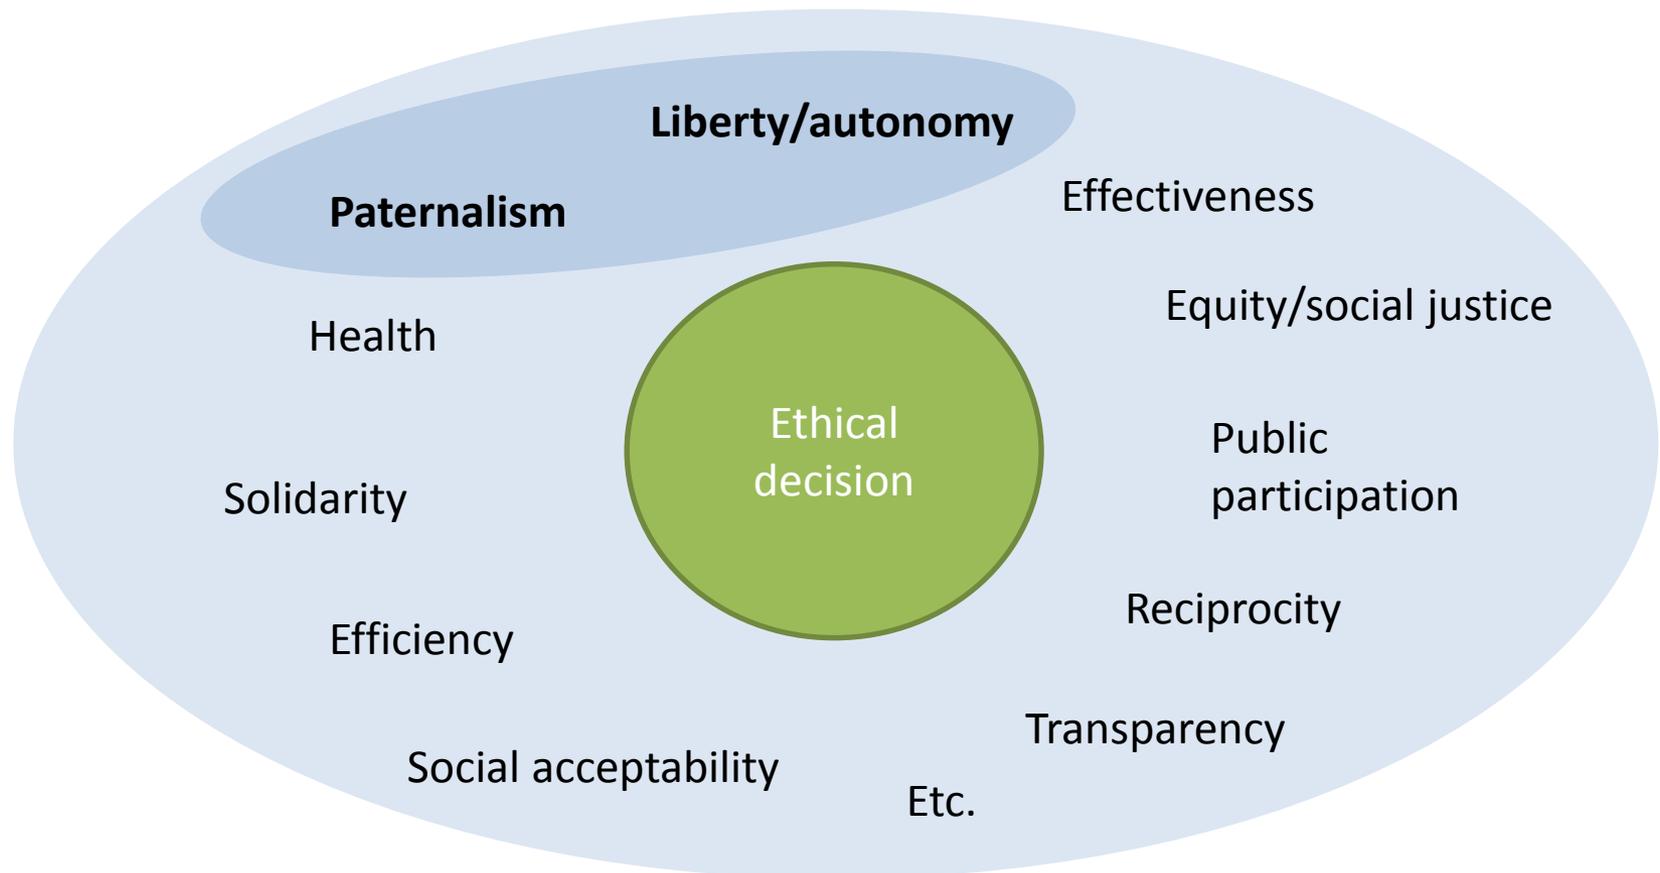

'Flu Shot' Photo credit: WFIU Public Radio.
Flickr.com. Licence: Creative Commons

Example: Mandatory flu vaccination for health workers

- For their own good, but against their will (**paternalism**)
- For their own good, but with their consent (**beneficence**)
- To establish herd immunity (**common good**)
- To avoid harming others (**harm principle**)
- To protect the most vulnerable (**justice, equity, etc.**)
- To avoid imposing a burden on the community (**justice, efficiency**)
- Etc.

Step 3: Broaden the analysis with the help of a more general ethics framework (2)

Many frameworks are available in public health to *help* identify issues, deliberate, and weigh between conflicting values

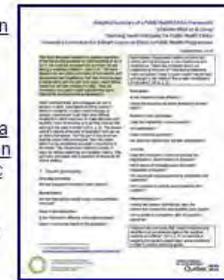

Step 3: Broaden the analysis with the help of a more general ethics framework (3)

A selection of such frameworks to choose from:

Baum et al. (2007)
Bernheim et al. (2009)
Kass (2001)
ten Have et al. (2012)
Marckmann et al. (2015)
Schröder-Bäck et al. (2014)
Upshur (2002)
Willison et al. (2012)

Adapted summaries of frameworks

Teaching Seven Principles for Public Health Ethics: Towards a Curriculum for a Short Course on Ethics in Public Health Programmes
Schröder-Bäck et al. (2014)
621 K

An Ethical Framework for the Prevention of Overweight and Obesity: A Tool for Thinking

2-page summaries of some of these are available here:

http://www.ncchpp.ca/127/Publications.ccnpps?id_article=1525

Here is a collection of frameworks with links to the original documents:
